DETAILED ACTION

1. The Examiner has carefully considered Applicant's remarks filed on 6/1/2004. Applicant's cancellation of claims 1-26 and 53-95 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Rejections not maintained are withdrawn. In particular, the cancellation of claims 1-26 overcomes the prior rejection over 35 U.S.C. 112, first paragraph (see Office action dated 5/1/2004).

Claim Objections

4. Claim 28 is objected to because of the following informalities:

In claim 28, line 2, please correct the recitation "30 nanometers" to --300 nanometers", so as to be consistent with the specification, which only teaches the thickness from about 0.3 μ (300 nanometers) to about 100 μ (specification, paragraph 0031).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. Claims 27-29 and 32-52 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A pattern of non-adhesive material providing a path for air egress from adhesive article is critical or essential to the practice

of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976).

More particularly, it is noted that the instantly claimed invention is directed to "an adhesive article which provides air egress" (Abstract) by a non-adhesive material which is generally present in a pattern that provides a path for air egress from the adhesive article, such as when lines are used, at least about 50% of the pattern should extend to the edge of the adhesive article to obtain acceptable air egress (specification, paragraph 0031).

Upon reconsideration, the Examiner notes that the independent claim 27, in its present form, lacks the aforementioned critical or essential element, and renders the instantly claimed invention unduly broad and in excess of disclosed enablement. Appropriate rewrite is required. Additionally, in the absence of a suitable thickness of the non-adhesive material, the claim 27 also appears to be unduly broad and encompasses some simple structures, such as an adhesive sheet comprising a thick adhesive layer could be easily embedded with pieces of non-adhesive material, such as coin shaped articles whose outer surfaces are below the outer surface of the adhesive layer. As such, the Examiner would like to suggest incorporating claim 28 into claim 27, so as to clarify the structural scope of the invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor S Chang whose telephone number is 571-272-1474. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel H Morris can be reached on 571-272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
